

The image shows a screenshot of the RStudio source editor. The editor has a light gray background. At the top, there is a toolbar with various icons for file operations and editing. Below the toolbar, the source editor contains two lines of R code. The first line is 'x <- c(2, 3, 4, 5, 4, 4, 9, 11)' and the second line is 'print(boxplot(x))'. The code is color-coded: 'x' is black, '<-' is black, 'c' is blue, and the numbers are black. The parentheses are black. The 'print' function is black, 'boxplot' is blue, and 'x' is black. The lines are numbered 1 and 2 on the left side of the editor. The second line ends with an underscore character '\_'.

```
1 x <- c(2, 3, 4, 5, 4, 4, 9, 11)
2 print(boxplot(x))_
```
